Residual Water Supply System

Video Presentation

Summary of system

1. Switch installed in bulk water tank
2. When water level reaches 10, 000 litres, switch cuts water supply to the sprays
3. Remaining water can only be pumped through fire fighting appliances

Ensuring uninterrupted availability of high efficiency fire fighting appliances.

Benefits of system

- Ensures fire-fighting appliances are always available for immediate response
- Easily modified and transferred to other industries
- Simple and easy to install
- Low cost

Discussion and questions

Ensuring uninterrupted availability of high efficiency fire fighting appliances.
